DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 2, 9, 10, and 17-40 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Although the claims are directed to a method that calculates the capacitance of a particular capacitive structure, the method itself is non-statutory because it describes only an algorithm without producing a useful output.

Additionally, claims 22 and 34 are directed to computer programs themselves. While a computer program is functional descriptive material, descriptive material does not fall into one of the defined statutory groups, therefore it is non-statutory.
